

## **SYSTEMS AND METHODS FOR UPLOADING AND DISTRIBUTING MEDICAL DATA SETS**

### **ABSTRACT OF THE DISCLOSURE**

Systems and methods for gathering medical data. In some cases, the systems  
5      comprise a server with a computer readable medium. The computer readable medium  
includes instructions executable to provide an access tool via a communication network. The  
access tool includes instructions executable to receive a first data set from an implantable  
medical device, provide a first user interface that includes an upload request, provide a  
second user interface that identifies the first data set derived from an implantable medical  
10     device, and communicate the first data set to the server via a communication network.
